**High Performance Additives**

# **MPEX<sup>®</sup>**

## **CATALYTIC CONVERTER CLEANER**

### **Technical Datasheet**

V.1.0 GB  
REV 06-07.2017.

## High Performance Additives

### TDS

Colour/Type	Clear, colourless / Catalytic converter cleaner
Areas of usage:	All petrol engines fitted with a catalytic converter
Environment:	Please check local requirements and MSDS
Packaging:	300ml Container
PPE:	Avoid skin contact. Refer to MSDS
Storage: Prevent	N/A
Surface prep:	None
Equipment needed:	None
Tests:	ISO9001. (For further information contact Leading Solvent Supplies Ltd)
Applying/Drying	Pour one bottle into the fuel tank before filling it with petrol
Origin/Manufacture:	Leading Solvent Supplies Ltd

V.1.0 GB  
REV 06-07.2017.

## High Performance Additives

## Useful Information

How to optimise the use of MPEX<sup>®</sup> Catalytic converter cleaner

### Applications:

MPEX<sup>®</sup> Catalytic converter cleaner addresses carbon build-up and deposits in cars fitted with a catalytic converter by cleaning the entire fuel system including the injectors, valves and pistons. This will improve combustion and engine performance whilst reducing emissions and minimising the deposit build-up. It also improves fuel economy, restores power and performance whilst reducing the emissions of hazardous exhaust gases.

### Method of use:

Pour one bottle into the fuel tank before filling it with petrol.

### Dosage:

One bottle treats 40 to 60 litres of petrol.

Recommended use: one bottle every 2000 km.

### IMPORTANT

MPEX<sup>®</sup> Are manufactured by Leading Solvent Supplies Ltd. MPEX<sup>®</sup> products information are based on laboratory tests and practical experience. Since the conditions under which the product is used are often outside the control of Leading Solvent Supplies Ltd, we can only guarantee the product quality, since the result is dependent on the substrate, pre-treatment, temperature, air humidity, application etc. Leading Solvent Supplies Ltd reserves the right, without notice to change the product and the given data.
